EXPERIENCE

Fullstack Developer

June 2024 – Present

Alltake Ites Pvt. Ltd.

4th Floor, Goodwill B'yond, Kharadi, Pune – 14

- Developed and maintained scalable backend applications using **Node.js**, **Express.js**, **Java Spring Boot**, and **PHP Laravel**, following **MVC** architecture for clean and modular code.
- Designed and implemented **RESTful APIs** to ensure efficient data handling and seamless integration between frontend and backend services.
- Worked on designing and deploying **Microservices**-based architectures to enable scalability, modularity, and independent service deployment.
- Managed **MongoDB** and **PostgreSQL** databases, implementing best practices in schema design, indexing, and query optimization to enhance performance and data retrieval.
- Integrated third-party services including **PayPal** and **Stripe** (for payments), **SendGrid** (email notifications), **Firebase** (for push notifications).
- Implemented secure **authentication and role-based authorization** using **JWT**, ensuring safe access to APIs, login, and registration endpoints.
- Performed backend security hardening after scanning the application with the **Nikto** web server scanner, addressing vulnerabilities and improving HTTP header configurations.
- Built responsive and interactive frontend interfaces using **React.js**, integrating them with backend APIs for smooth data exchange and user experience.
- Deployed and managed frontend applications using **AWS Amplify**, enabling CI/CD pipelines and seamless hosting with automatic builds and deployments.
- Utilized **AWS S3** for secure and scalable object storage, handling file uploads, media storage, and static asset management.
- Worked in **Agile** development environments, participating in regular sprints, stand-ups, and retrospectives to ensure timely and iterative delivery.
- Collaborated closely with frontend developers using **React-Bootstrap** and **Tailwind CSS**, assisting with API integration to maintain consistent functionality and design.
- Proficient in using version control tools like **Git**, **GitHub**, and **GitLab**, and project management tools like **Jira** and **Basecamp** for efficient workflow management.
- Utilized **Postman** for thorough API testing and debugging, ensuring reliability, performance, and accurate data responses.
- Used **Cloudflare** for optimized content delivery and enhanced application security, improving performance and availability.

Software Developer

April 2023 - May 2024

Correct Cloud Pvt. Ltd.

Kausar Baugh Kondhwa, Pune

- * Developed a **REST API** using Spring Boot, Spring Reactive and PostgreSQL to store data.
- * Developed a full-stack web application using **Spring Boot**, **Spring Reactive**, **Angular**, **Vue Js**, **PostgreSQL** and **JDBC** to analyze GitHub data.
- * Explored ways to visualize **GitHub**.
- * Highly skilled in **Java** programming with extensive experience in developing, testing, and debugging code.
- * Skilled in integrating Java applications with databases using JDBC, JPA frameworks.
- * Proficient in using **Git** for version control, including branching, merging, and resolving conflicts.
- * Proficient in using **Postman** for testing APIs, including sending requests, validating responses, and managing test suites.
- * Actively engage in continuous learning and exploration of new features and best practices in Postman to enhance API testing and development skills.
- * Used **JWT** to authenticate the data provide security to the login and register page.

TECHNICAL SKILLS

Languages: Java, C, C++, .Net Framework, MySQL, PostgreSQL, JavaScript, HTML/CSS

Frameworks: NodeJs, ExpressJs, MongoDB, Firestore Database, SpringBoot, Spring Reactive, ReactJs, NextJs, Tailwind CSS, Bootstrap, Angular, Php CodeIgniter, Microservices

Developer Tools: Git, GitHub, GitLab, Postman, Cpanel, Jira, CloudFlare, Nikto, Kibana, Grafana, ServiceNow

Third-Party Integrations: Sendgrid, Firebase Push Notification, Paypal payment process, ipStack, user-agent

Deployment Servers: Render, Firebase Functions, AWS S3, AWS Amplify, AWS RDS, Supabase and Neon

PROJECTS

SmartQC | *Lead Generation Product*

Alltake's Product

- SmartQC, the essential data quality checker tool, ensures accurate, reliable data for lead generation.
- Verifies contact information, eliminates duplicates, and validates lead sources to improve lead accuracy.
- Enhances lead quality, streamlines operations, and drives marketing and sales effectiveness in a competitive landscape.
- Integrated third-party services including **PayPal** (payments), **SendGrid** (email notifications), **Firebase** (push notifications), and **IPStack** (IP-based data) to enhance functionality.

Kitecyber | *IT Security App*

Correct Cloud Project

- Developed a security-focused application using **Java** and **Spring Boot**, providing REST APIs to ensure secure backend operations.
- Integrated **PostgreSQL** for robust data storage and secure user data management.
- Implemented user management features such as authentication, authorization, and profile handling.
- Visualized GitHub data to demonstrate team collaboration and project activity.

Market40 | *News Web Application*

Alltake's Product

- Developed a dynamic and responsive news platform using **Next.js** for the front-end, ensuring fast server-side rendering and improved SEO.
- Built and managed the backend using **Laravel**, handling news content management, user authentication, and API integrations.
- Implemented features including news categorization, search functionality, and real-time updates for a seamless user experience.
- Optimized the application for cross-device compatibility, performance, and fast content delivery.

EdgeLinking | *Marketing Publication Platform*

Alltake's Product

- Developed a scalable marketing publication platform featuring blogs and resources using **Next.js** and **Tailwind CSS**, ensuring fast rendering and responsive UI.
- Built backend services using **Node.js**, handling content management, APIs, and seamless data flow between frontend and database.
- Implemented secure **authentication and role-based access control (RBAC)** using **Firebase Authentication**, enabling controlled access for different user roles.
- Utilized **Firestore Database** for efficient real-time data storage and retrieval, optimizing performance for dynamic content updates.
- Integrated features such as blog publishing, resource management, and user-specific content access to enhance user engagement.
- Deployed and hosted the application using **AWS Amplify**, enabling CI/CD pipelines, high availability, and seamless deployment workflows.

EDUCATION

Savitribai Phule Pune University

Bachelor of Computer Application - BCA

Abeda Inamdar Senior College, Pune

CGPA: 8.9/10

LANGUAGES KNOWN

- * **English**
- * **Hindi**
- * **Urdu**
